## **Praktikum Framework 4**

1. Pembuatan HomeController pada cmd

```

1 <?php
2
3 namespace App\Http\Controllers;
4
5 use Illuminate\Http\Request;
6
7 class HomeController extends Controller
8 {
9     function index()
10     {
11         $pageTitle = 'Home';
12
13         return view('home', ['pageTitle' => $pageTitle]);
14     }
15 }
16
17

```

Pada File Controller/HomeController

2.

```

1 <DOCTYPE html>
2 <html lang="en">
3
4 <head>
5     <meta charset="UTF-8">
6     <meta http-equiv="X-UA-Compatible" content="IE=edge">
7     <meta name="viewport" content="width=device-width,
8     initial-scale=1.0">
9     <title>{{ $pageTitle }}</title>
10     @vite('resources/sass/app.scss')
11 </head>
12
13 <body>
14     <nav class="navbar navbar-expand-md navbar-dark bg-primary">
15         <div class="container">
16             <a href="{{ route('home') }}" class="navbar-brand mb-0 h1"><i class="bi-hexagon-fill me-2"></i> Data
17             Master</a>
18             <button type="button" class="navbar-toggler" data-bs-toggle="collapse"
19             data-bs-target="#navbarSupportedContent">
20                 <span class="navbar-toggler-icon"></span>
21             </button>
22             <div class="collapse navbar-collapse" id="navbarSupportedContent">
23                 <ul class="navbar-nav flex-row flex-wrap">
24                     <li class="nav-item col-2 col-md-auto"><a href="{{ route('home') }}"
25                     class="nav-link active">Home</a></li>
26                     <li class="nav-item col-2 col-md-auto"><a href="{{ route('employees.index') }}"
27                     class="nav-link">Employee List</a></li>
28                 </ul>
29                 <ul>
30                     <li class="nav-link">Employee List</li>
31                 </ul>
32                 <div class="d-lg-none text-white-50">
33                     <a href="{{ route('profile') }}" class="btn
34                     btn-outline-light my-2 ms-md-auto"><i
35                     class="bi-person-circle me-1"></i>
36                     My Profile</a>
37                 </div>
38             </nav>
39             <div class="container mt-4">
40                 <div class="d-flex align-items-center py-2 px-4 bg-light
41                 rounded-3 border">
42                     <div class="bi-house-fill me-3 fs-1"></div>
43                     <div class="mb-a">Well done! this is {{ $pageTitle }}.</div>
44                 </div>
45             </div>
46             @vite('resources/js/app.js')
47         </body>
48     </html>
49

```

Pada View/welcome.blade.php bisa disesuaikan dengan modul yang telah diberikan.

3.

```

PS C:\Users\ASUS\OneDrive\Desktop\Praktikum Framework\Modul4\Prakframework4> php artisan make:controller ProfileController
--invokable

```

```

ntrollers\ProfileController.php] created successfully.

```

Pembuatan ProfileController pada cmd agar muncul pada Http.

```

1 <!(DOCTYPE html)
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta http-equiv="X-UA-Compatible" content="IE=edge">
7   <meta name="viewport" content="width=device-width,
8   initial-scale=1.0">
9   <title>{{ $pageTitle }}</title>
10   @vite("resources/sass/app.scss")
11 </head>
12
13 <body>
14   <nav class="navbar navbar-expand-md navbar-dark bg-primary">
15     <div class="container">
16       <a href="{{ route('home') }}" class="navbar-brand mb-0 h1"><i class="bi-hexagon-fill me-2"></i> Data
17       Master</a>
18       <button type="button" class="navbar-toggler" data-bs-toggle="collapse"
19       data-bs-target="#navbarSupportedContent">
20         <span class="navbar-toggler-icon"></span>
21       </button>
22       <div class="collapse navbar-collapse">
23         <div class="navbarSupportedContent">
24           <hr class="d-lg-none text-white-50">
25           <ul class="navbar-nav flex-row flex-wrap">
26             <li class="nav-item col-6 col-md-auto"><a href="{{
27             route('home') }}" class="nav-link">Home</a></li>
28             <li class="nav-item col-6 col-md-auto"><a href="{{
29             route('employees.index') }}" class="nav-link">Employee List</a></li>

```

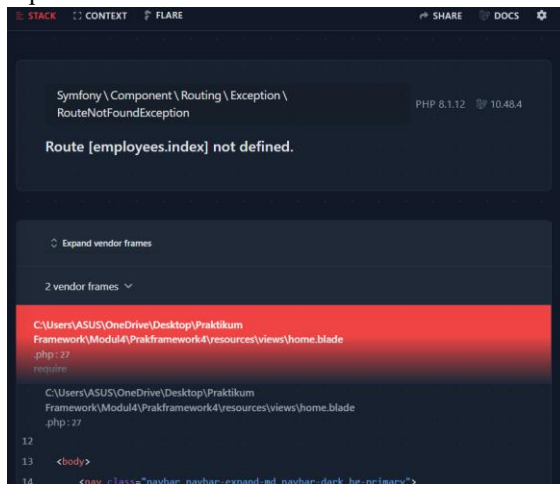

```

30
31           </ul>
32           <hr class="d-lg-none text-white-50">
33           <a href="{{ route('profile') }}" class="btn
34           btn-outline-light my-2 ms-md-auto"><i class="bi-person-circle me-1"></i>
35           My Profile</a>
36         </div>
37       </div>
38     </div>
39     <div class="container mt-4">
40       <h4>{{ $pageTitle }}</h4>
41       <hr>
42       <div class="d-flex align-items-center py-2 px-4 bg-light
43       rounded-3 border">
44         <div class="bi-person-circle me-3 fs-1"></div>
45         <h4 class="mb-0">Well done! this is {{ $pageTitle }}</h4>
46       </div>
47     </div>
48   @vite("resources/js/app.js")
49 </body>
50 </html>

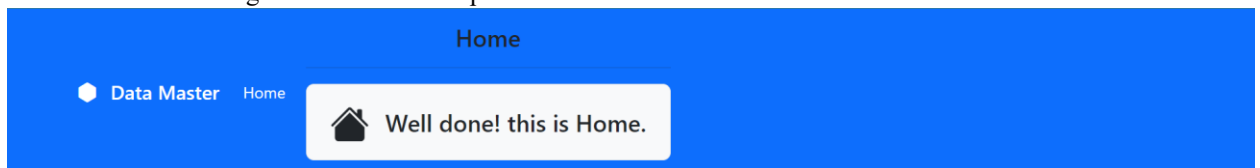

```

Setelah pembuatan ProfileController pada cmd lalu buat **resource/views/** dan buat **/profile.blade.php** pada **/views**.

Kita akan menghilangkan line 77 pada file web.php dengan itu untuk menghindari eror yang akan muncul seperti ini

Jika line sudah dihilangkan akan muncul seperti ini :

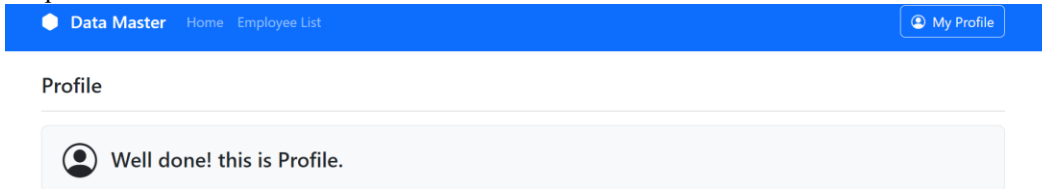

4. Berikut isi dari ProfileController yang telah dibuat di cmd dengan isi use App\Http\Controllers\ProfileController; diisi dengan

```

2 namespace App\Http\Controllers;
3 use Illuminate\Http\Request;
4 class ProfileController extends Controller
5 {
6     /**
7      * Handle the incoming request.
8      */
9     public function __invoke(Request $request)
10    {
11        $pageTitle = 'Profile';
12        return view('profile', ['pageTitle' => $pageTitle]);
13    }
14 }
15

```

## Output dari Profile

## 5. Pembuatan EmployeeController pada cmd

```

Press Ctrl+C to stop the server
raktikuphp artisan make:controller EmployeeController --resource

INFO Controller [C:\Users\ASUS\OneDrive\Desktop\Praktikum Framework\Modul4\Prakframework4\app\Http\Controllers\Employee
Controller.php] created successfully.

```

## 6. Lalu bisa dengan buka views/ lalu buat file employee dalam views/ dan pada employee buatlah file lagi employee/create.blade.php dengan isi dibawah ini.

```

1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5     <meta charset="UTF-8">
6     <meta http-equiv="X-UA-Compatible" content="IE=edge">
7     <meta name="viewport" content="width=device-width,
8     initial-scale=1.0">
9     <title>{{ $pageTitle }}</title>
10    @vite('resources/sass/app.scss')
11 </head>
12
13 <body>
14     <nav class="navbar navbar-expand-md navbar-dark bg-primary">
15         <div class="container">
16             <a href="{{ route('home') }}" class="navbar-brand mb-0 h1"><i class="bi-hexagon-fill me-2"></i> Data
17             Master</a>
18             <button type="button" class="navbar-toggler" data-bs-toggle="collapse"
19             data-bs-target="#navbarSupportedContent">
20                 <span class="navbar-toggler-icon"></span>
21             </button>
22             <div class="collapse navbar-collapse" id="navbarSupportedContent">
23                 <hr class="d-lg-none text-white-50">
24                 <ul class="navbar-nav flex-row flex-wrap">
25                     <li class="nav-item col-2 col-md-auto"><a href="{{ route('home') }}" class="nav-link">Home</a></li>

```

## 7. Isi pada create.blade.web

```
resources > views > employee > create.blade.php > html
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta http-equiv="X-UA-Compatible" content="IE=edge">
7   <meta name="viewport" content="width=device-width,
8   initial-scale=1.0">
9   <title>{{ $pageTitle }}</title>
10  @vite('resources/sass/app.scss')
11 </head>
12
13 <body>
14   <nav class="navbar navbar-expand-md navbar-dark bg-primary">
15     <div class="container">
16       <a href="{{ route('home') }}" class="navbar-brand mb-0 h1"><i class="bi-hexagon-fill me-2"></i> Data
17       Master</a>
18       <button type="button" class="navbar-toggler" data-bs-toggle="collapse"
19       data-bs-target="#navbarSupportedContent">
20         <span class="navbar-toggler-icon"></span>
21       </button>
22       <div class="collapse navbar-collapse" id="navbarSupportedContent">
23         <hr class="d-lg-none text-white-50">
24         <ul class="navbar-nav flex-row flex-wrap">
25           <li class="nav-item col-2 col-md-auto"><a href="{{ route('home') }}" class="nav-link">Home</a></li>
```

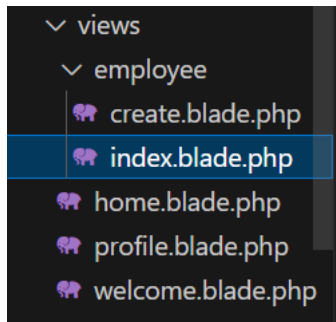

```
15 <div class="container">
22 <div class="collapse navbar-collapse" id="navbarSupportedContent">
27   class="nav-link">Employee List</a></li>
28 </ul>
29 <hr class="d-lg-none text-white-50">
30 <a href="{{ route('profile') }}" class="btn
31 btn-outline-light my-2 ms-md-auto"><i
32   class="bi-person-circle me-1"></i>
33   My Profile</a>
34 </div>
35 </div>
36 </nav>
37 <div class="container-sm mt-5">
38   <form action="{{ route('employees.store') }}" method="POST">
39     @csrf
40     <div class="row justify-content-center">
41       <div class="p-5 bg-light rounded-3 border col-xl-6">
42         @if ($errors->any())
43           @foreach ($errors->all() as $error)
44             <div class="alert alert-danger
45             alert-dismissible fade show">
46               {{ $error }}
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS

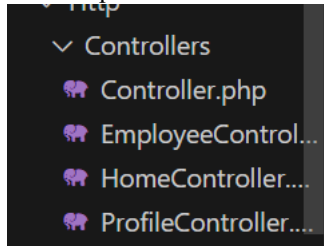

```
<div class="row justify-content-center">
  <i class="bi-person-circle fs-1"></i>
  <h4>Create Employee</h4>
</div>
<hr>
<div class="row">
  <div class="col-md-6 mb-3">
    <label for="firstName" class="form-label">First Name</label>
    <input class="form-control" type="text" name="firstName" id="firstName" value=""
    placeholder="Enter First Name">
  </div>
  <div class="col-md-6 mb-3">
    <label for="lastName" class="form-label">Last
    Name</label>
    <input class="form-control" type="text" name="lastName" id="lastName" value=""
    placeholder="Enter Last Name">
  </div>
  <div class="col-md-6 mb-3">
    <label for="email" class="form-label">Email</label>
    <input class="form-control" type="text" name="email" id="email" value=""
    placeholder="Enter Email">
  </div>
</div>
```

MS OUTPUT DEBUG CONSOLE TERMINAL PORTS

8. Pada views/ buat file /employee dengan didalam file employee terdapat create.blade.php dan index.blade.php

9. Pada Http/ ditambahkan file EmployeeController.php , HomeController.php dan ProfileController

10. Berikut isi dari welcome.blade.php

```

1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5     <meta charset="UTF-8">
6     <meta http-equiv="X-UA-Compatible" content="IE=edge">
7     <meta name="viewport" content="width=device-width,
8     initial-scale=1.0">
9     <title>Belajar Controller & View pada Laravel</title>
10    @vite('resources/sass/app.scss')
11 </head>
12
13 <body>
14     <div class="container text-center my-5">
15         <h1 class="mb-4">Belajar Controller & View pada Laravel</h1>
16         {{{-- Contoh cara mereferensikan gambar di dalam file blade dengan
17 menggunakan pendekatan Vite --}}
18         
19         <div class="col-md-2 offset-md-5 mt-4">
20             <div class="d-grid gap-2">
21                 <a class="btn btn-dark" href="">Home</a>
22             </div>
23         </div>
24     </div>
25     @vite('resources/js/app.js')

```

```

16     <h1 class="mb-4">Belajar Controller & View pada Laravel</h1>
17     {{{-- Contoh cara mereferensikan gambar di dalam file blade dengan
18 menggunakan pendekatan Vite --}}
19     
20     <div class="col-md-2 offset-md-5 mt-4">
